DEDICATION

In loving memory of my late father, Simeon Nyatuka, whose guidance, sacrifice and inspiration remain part of my educational journey.

With heartfelt appreciation to Hyrine Kerubo, Peter Munde Mong'are, Teresa Kwamboka Sawe, Mnaree, Richie, Duke, Caleb, Cuba, Philo, Rob, Tim, Mr Peter Kimani, and all those whose support and encouragement have strengthened this journey.

To Her, my special one, for being a special part of my journey and for the place you hold in my heart.

To my fellow teachers, guardians, family and every learner who continues to inspire the work behind Peak Achievers.

May every learner using this book remain curious, work with determination, and discover the confidence to learn, apply, think big and achieve.

CONTENTS

Strand 1: Scientific Investigation - Introduction to Integrated Science; Laboratory Safety; Laboratory Apparatus and Instruments; Strand Revision.

Strand 2: Mixtures, Elements and Compounds - Mixtures; Acids, Bases and Indicators; Strand Revision.

Strand 3: Living Things and Their Environment - Human Reproductive System; Human Excretory System; Strand Revision.

Strand 4: Force and Energy - Electrical Energy; Magnetism; Strand Revision.

Then: 5 Mixed Concepts Tests with answers; 5 Main CBE End-of-Grade Assessment Models with complete marking schemes; Final learner message; About the Author.

REVISION QUIZ ANSWERS

1. OBSERVE -> ASK -> PREDICT -> PLAN -> INVESTIGATE -> MEASURE -> RECORD -> INTERPRET -> CONCLUDE -> APPLY.
2. Volume/amount of water supplied.
3. Plant growth/height increase.
4. Any two: plant type, soil, light, container size, starting size, duration.
5. It must be based on the evidence collected.
6. Check the procedure/measurement and repeat if appropriate; do not automatically delete it.
7. Example: the solution changed colour / the surface became rough.
8. Example: temperature was 35 deg C / volume was 20 mL.
9. It organises data for easier comparison and interpretation.
10. It should be clear, testable and answerable using evidence.

4. Do not use it; report it.
5. Exposed conductors can cause shock, burns or fire.
6. Using approved tools/brush and designated container, not bare hands.
7. So they can respond quickly and safely if an accident occurs.
8. Inform the teacher immediately and follow the laboratory first-aid/rinsing procedure.
9. It increases risk of collisions, falls, spills and breakages.
10. They protect the eyes from splashes or particles.

5. Turns red litmus blue.
6. Universal indicator with its colour chart.
7. It is unsafe and scientifically inappropriate.
8. Acid + base $\rightarrow$ salt + water.
9. The chart links colour ranges to approximate pH values.
10. They may contain different pigments with different responses to pH.

5. Why is plastic used around wires?
6. Energy change in bulb?
7. Energy change in iron?
8. Give one renewable electrical-energy source.
9. A bulb fails to light. Give two checks.
10. Why not test materials using mains supply?

REVISION QUIZ ANSWERS

1. The path becomes complete and current can flow; the bulb/device may operate.
2. The path is broken and current stops through the circuit.
3. Conductor.
4. Insulator.
5. It insulates the conductor and reduces unwanted electrical contact.
6. Electrical -> light + heat.
7. Electrical -> heat.
8. Solar energy.
9. Check connections/switch, cell, bulb and wire continuity - any two.
10. Risk of severe electric shock, burns and fire.
